CORE STRENGTHS

Svelte 5 and TypeScript
React and Next.js
Node.js and typed APIs
PostgreSQL and data modelling
Cloudflare edge platforms
Performance and responsive UI
Cross-functional delivery

SELECTED PROOF

~50%

performance improvement on a production
grid rewrite

Multi-brand

delivery across live gaming products

3-12 players

server-authoritative real-time game rooms

PROFILE

Full-stack developer building web products, internal platforms, and interactive customer experiences. Strongest where product thinking and implementation meet: interface quality, maintainable architecture, performance, and dependable delivery.

EXPERIENCE

DigitalBeat LTD

May 2025 - Present

Full Stack Developer

- Led a Svelte and TypeScript games-grid rewrite delivering approximately 50% better performance than the legacy implementation.
- Shipped improvements across brands including NorthStar Bets and Hard Rock Bet Mexico while balancing shared architecture with client requirements.
- Built frontend features, internal API integrations, and optimization tooling across engineering, design, product, and delivery.

DigitalBeat LTD

Apr 2024 - May 2025

Web Operations Executive

- Developed responsive production campaigns and improved reliability through troubleshooting, performance checks, cross-browser QA, and CMS release workflows.

The Rock Hotel Gibraltar

Feb 2024 - Apr 2024

Web Developer Intern

- Turned the hotel Wall of Fame into an interactive, touchscreen-compatible web experience and prototyped immersive visitor interactions.

Informática CR

Sep 2023 - Dec 2023

Web Developer Intern

- Built a WordPress ticket and receipt workflow with customer accounts, print requests, PDF generation, history, and document retrieval.

SELECTED PROJECTS

El Impostor

Real-time social deduction game for 3-12 players using React, WebSockets, Cloudflare Workers, and Durable Objects.

Nosotros

Private iOS-first PWA spanning a Next.js frontend, Hono API, PostgreSQL, shared validation, and self-hosted data.
