# JAVIER VALLEJO

**FULL-STACK DEVELOPER**

La Línea de la Concepción, Cádiz, Spain | mail@jvallejo.dev | jvallejo.dev | GitHub | LinkedIn

## PROFILE

Full-stack developer at DigitalBeat in Gibraltar. I own DB Games Grid, the Svelte 5 casino catalogue used across several brands, and built the Hard Rock Bet Mexico portal around it. Outside work I build real-time and self-hosted web apps.

## EXPERIENCE

**DigitalBeat LTD, Gibraltar** Apr 2024 - Present

*Full Stack Developer* May 2025 - Present

- Own DB Games Grid, a Svelte 5 web component for game search, favorites, jackpots, and live tables. Took it over at version 1.4 and have led it through the 2.x releases (currently 2.7.1).
- Built the Hard Rock Bet Mexico portal shell across casino, live casino, sportsbook, and promotions: route handling, custom mobile navigation, and authentication-aware content.
- Kept the whole component, including the Svelte runtime and styles, to one 46 KB gzipped script; shared timers and caches, scheduled visual updates by frame, and limited rendering to visible content for lower-end phones.
- Adapted the component for NorthStar, 888, RoyalsCasino, Galera.bet, and Brasilbet with each brand's product and design teams.

*Web Operations Executive* Apr 2024 - May 2025

- Built responsive HTML, CSS, and JavaScript campaign pages and brand content in Playtech CMS.
- Handled cross-browser QA, production troubleshooting, content versioning, and releases.

**The Rock Hotel Gibraltar, Gibraltar** Feb 2024 - Apr 2024

*Web Developer Intern*

- Turned the hotel's physical Wall of Fame into a touchscreen web experience with HTML, CSS, JavaScript, and AroSuite, adapted to several display sizes.

**Informática CR, Spain (Remote)** Sep 2023 - Dec 2023

*Web Developer Intern*

- Built a WordPress ticket and receipt system for a printing business, with customer accounts, print requests, PDF generation, and document history.

## EDUCATION

**Cesur, Spain** 2022 - 2024

*Higher Technical Diploma in Web Application Development (DAW) | Grade: 9.8/10*

## SELECTED PROJECTS

**El Impostor** | Live product | Source code | *React, TypeScript, Cloudflare Workers, Durable Objects, WebSockets*

- Social deduction game for 3-16 players. One Durable Object per room owns the game state, secret roles go only to the right player, and players can rejoin after a dropped connection.

**Nosotros** | Private demo | *Next.js, Hono, PostgreSQL, Drizzle, Cloudflare*

- Installable app for two people with shared calendars, photos, and lists. Next.js frontend and Hono API, with PostgreSQL on a self-hosted server behind a Cloudflare tunnel.

## TECHNICAL SKILLS

**Languages and frameworks:** TypeScript, JavaScript, Svelte 5, React, Next.js, Web Components, HTML, CSS, Python
**Backend and data:** Node.js, Hono, FastAPI, PostgreSQL, Drizzle, Supabase
**Infrastructure and tooling:** Cloudflare Workers, Durable Objects, Vercel, Docker, AWS, Git, Vite, Playwright, Vitest
**Certifications:** JavaScript Algorithms and Data Structures (freeCodeCamp, 2025); Responsive Web Design (freeCodeCamp, 2024)
**Languages spoken:** Spanish (native or bilingual); English (full professional proficiency)
