

JAVIER VALLEJO

FULL-STACK SOFTWARE ENGINEER

La Línea de la Concepción, Cádiz, Spain | jvallejoarguez@gmail.com | jvallejo.dev | GitHub | LinkedIn

PROFILE

Performance-minded full-stack engineer who turns complex platform constraints into fast, app-like products. I combine architecture, optimization, cross-device craft, and strong design judgment, with primary ownership of DB Games Grid and its flagship portal experience.

EXPERIENCE

DigitalBeat LTD, Gibraltar

Apr 2024 - Present

Full Stack Developer

May 2025 - Present

- Took primary ownership of DB Games Grid around its 1.4-era codebase and led its 2.x evolution into a reusable Svelte 5 platform for game discovery and live casino experiences.
- Built the flagship Hard Rock Bet Mexico portal across casino, live casino, sportsbook, and promotions, including custom mobile navigation, pre-paint state, staged content bootstrapping, route orchestration, and authentication-aware UI.
- Made performance a product constraint: kept shipped code lean, eliminated repeated work, shared timers and caches, scheduled visual updates efficiently, and optimized rendering for lower-end devices.
- Expanded the platform with live data, search and facets, personalization, jackpots, provider navigation, deep routes, analytics, and accessible interaction.
- Partnered across product, design, engineering, and delivery to refine modern responsive patterns and carry the shared foundation into additional brands.

Web Operations Executive

Apr 2024 - May 2025

- Developed responsive HTML, CSS, and JavaScript campaigns and brand experiences within Playtech CMS.
- Improved production reliability through troubleshooting, performance checks, cross-browser QA, content versioning, and release coordination.

The Rock Hotel Gibraltar, Gibraltar

Feb 2024 - Apr 2024

Web Developer Intern

- Turned the hotel's physical Wall of Fame into an interactive, touchscreen-compatible web experience and adapted it across visitor displays.

Informatica CR, Spain (Remote)

Sep 2023 - Dec 2023

Web Developer Intern

- Built a WordPress ticket and receipt workflow with customer accounts, print requests, PDF generation, history, and document retrieval.

EDUCATION

Cesur, Spain

2022 - 2024

Higher Technical Diploma in Web Application Development (DAW) | Grade: 9.8/10

SELECTED PROJECTS

El Impostor | Live product | React, TypeScript, Cloudflare Workers, Durable Objects, WebSockets

- Built a server-authoritative social deduction game for 3-12 players with private rooms, role-safe messaging, reconnectable sessions, timers, and voting.

Nosotros | Private demo | Next.js, Hono, PostgreSQL, Drizzle, Cloudflare

- Built a private iOS-first PWA with shared calendars, photos, lists, mood tracking, memories, games, and a self-hosted data layer.

TECHNICAL SKILLS

Frontend platform: TypeScript, JavaScript, Svelte 5, React, Next.js, Web Components, HTML, CSS

Performance engineering: bundle and render optimization, lazy and conditional rendering, caching and indexing, frame-scheduled updates, low-end-device optimization

Product systems: WebSockets, search and facets, personalization, routing, authentication-aware UI, analytics, accessibility

Backend and data: Node.js, Hono, FastAPI, Python, SQL, PostgreSQL, Supabase

Delivery and quality: Cloudflare Workers, Durable Objects, AWS, Docker, Vercel, Git, Vite, Playwright, Vitest

Certifications: JavaScript Algorithms and Data Structures (freeCodeCamp, 2025); Responsive Web Design (freeCodeCamp, 2024)

Languages spoken: Spanish (native or bilingual); English (full professional proficiency)
